

# Ajedium™ Films -- Solef® PVDF 9009

## polyvinylidene fluoride

Solef® 9009 PVDF homopolymer is a semi-crystalline fluoropolymer. Solef® film is chemically inert to most acids, aliphatic and aromatic organic compounds, chlorinated solvents and alcohols.

Solef® PVDF film has a very high purity, abrasion resistance comparable to that of polyamides and relatively low coefficient of friction. These films can be used in a wide range of temperatures and have excellent intrinsic fire resistance.

Solef® PVDF films have demonstrated excellent weathering properties and are extremely resistant to UV radiation and common industrial and environmental pollutants.

Solef® PVDF films can be used in a wide range of applications, including release films, filters, chemical resistance lining, outdoor UV resistant needs as well as electric and electronic applications.
